

AGI sets the standard for efficiency, speed and durability with AGI GrainVacs.

AGI continues to be a leading innovator, bringing the best grain vacs to your farm.

The VRX utilizes VR Technology to reach capacities up to six thousand bushels per hour at a sound volume quieter than a tractor.

AGI applied that same VR Technology to the VR-TWELVE, achieving up to ten thousand bushels per hour, using less horsepower than competing models.

Contact DEALER NAME today at CONTACT DETAILS for more information on the revolutionary AGI GrainVacs.
