RE: CX3 1549 FMD Drive Idler Kits

Dear AGI Dealers,

Last week, a running change was made to the BCX3 1549 belt idlers and drive pulleys which will be standard on all new production units.

In addition to this change, we've established a kit which contains new idlers for both drive belts, new drive pulleys for the S-Drive, a new belt for the gearbox to drive roller, as well as all necessary hardware.

Our expectation is that this kit could be used to resolve any field issues that may remain present after the factory recommended adjustments have been made. In cases where the kit is required, AGI will provide this to the dealer at no charge with labor being provided by the dealer or end use customer.

Dealers must call to order the kit and have the serial number and shipping address for where they want the kit shipped to.

The kit part numbers are below:

15011083-BK – BCX3 Under Mount Kit

15011082-BK – BCX3 Top Mount Kit

Please reach out to me if you have any questions.
