

4" CORRUGATED BINS

HISTORY

AGI has been a leading manufacturer of corrugated bins for over 100 years and producing 4" corrugated bins for over 25 years. AGI's premium quality storage solution, flat bottom bins are built with today's farmers in mind. Engineered for superior strength and utilizing heavy gauge, ultra-flat corrugated steel, flat bottom bins are tested for all weather conditions.

EXTRA STRONG CONSTRUCTION THROUGHOUT

Engineers have designed the maximum strength out of every pound of steel to give you superior structural strength over the entire bin. That means a bin that is better equipped to handle the added weight of heavy snow loads, or the structural stress of extreme temperature conditions and high winds.

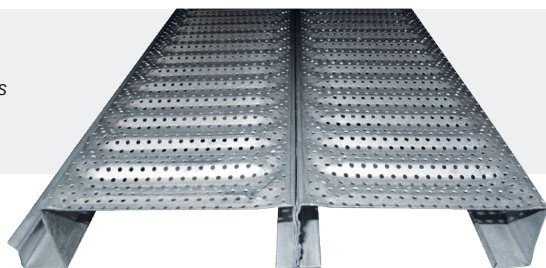

EXCEPTIONAL BIN CLEAN-OUT

An ultra-flat 4" wide corrugation pattern delivers far superior bin clean-out, virtually eliminating the possibility of grain hang-up. Particularly when paired with AGI unload systems, you can get even closer to the floor for easy and efficient clean-out.

LOCK-N-LOAD® FLOOR SYSTEM

- Supports up to 100 feet of grain depth
- Widest floor planks in the industry allow for quick installation
- Flooring is available in two perforation sizes:
 - 20 ga. 0.054 perforation for small grains
 - 20 ga. 0.094 perforation for larger grains

10" wide floor planks

PRODUCT OPTIONS

- Unstiffened bins up to 9 tiers are engineered to eliminate the need for internal or external stiffeners
- Stiffened sidewall bins up to 26 tiers are more efficient at achieving the maximum load possible out of each pound of steel

WARRANTY

5-year limited warranty on galvanized bins. The warranty runs from the date of purchase from the dealer or distributor, authorized by AGI. Within the warranty period, AGI will replace the goods and/or original manufactured components thereof which are found, to AGI's satisfaction, to be defective. Please see warranty documentation for more details.
