

Bulletin – Truck loading augers ring gear

ECN ID #	ECN4479
DATE	July 23, 2024
BRAND	AGI, Westfield, Hutchinson, Mayrath, GrainMaxx
MODEL	STX2, XTA, UTX
DATE RANGE	July 1, 2024 - present
DETAILS	Truck loading augers - axle and ring gear wheels change

We have updated the style of ring gear that is used on our truck loading augers, which includes some hub changes on the axles along with that. The new hubs (PN: 203693) will now come with wheel studs as opposed to wheel bolts. The existing axles are backwards compatible with this change as well, see the table below for old and new part numbers that will be used.

For any dealers having unassembled stock of the old-style ring gears, please continue to use them up as a set on each unit.

Regular SP tires	
Old Part Numbers	New Part Numbers
24058 – Axle & hub without studs  19273 10-22289 19267 – hub only	24058 – Axle & hub with studs  203695 10-21330 203689 203693 – hub only

All wheel drive SP tires	
Old Part Numbers	New Part Numbers
24058 – Axle & hub without studs  19273 201496 19267 – hub only	24058 – Axle & hub with studs  203695 201231 203689 203693 – hub only
