Product Release Bulletin

NEW Sweep End-Wheel

Product: Sweep End Wheel

Product Overview: With the new Sweep End Wheel we eliminate having the enclosed drive in between the sweep and the wheel as the 8.5 reduction is built inside of the wheel. This allows newly designed sweeps to be closer to the bin wall reducing the amount of grain along the edges of the bin. The thick polyurethane treads break up compacted grain and dig down on the bin floor, powering through all types of grain with ease for more efficiency, less downtime and greater productivity. In addition, the tread sections can be removed easily when in need of replacement.

Retrofit kits are also available for most 8" and 10" Power Sweeps and Klean Sweeps already installed. Installation of the Retro-Fit Kits have been done in less than 15 minutes.

Comments: After Retro-Fit Kit is installed, the wheel will be a little farther from the wall due to the elimination of the gap from the chain drive reduction.

Part Numbers and List prices for Retro-Fit Kits

Catalog #	Retro-Fit Kit Description	List Price
BK1021W	810 Klean Sweeps and 8" HD Power Sweeps	\$1,250
BK1022W	8" and 10" Standard Power Sweeps	\$1,250
BK1221W	1012 Klean Sweeps	\$1,575
BK1222W	10" HD Power Sweeps	\$1,575

Marketing: A promotional video is available to view and download on Hutchinson/Mayrath's YouTube Channel and Facebook page. Contact your TM or sales office if you need further assistance.

Manufacturing Start Date for Retro-Fit Kits: 9/1/2015

Manufacturing Start Date for Newly Designed Sweeps: The new sweep end wheel will be on all newly designed 810's, 1012's, 8", 10" Standard and Heavy Duty Power Sweeps. Refer to the 2016 Catalog for new part numbers on the sweeps and to the PIA's for additional information.
