

Product Bulletin

Doc. No. GPM-SS-B-0034

Date: January 5, 2024

Product ref: Roof Ring Bracket Product Transfer Release

Comm: STANDARD

Overview:

In line with AGI's North American Bin Standardization strategic goals, the Grand Island Roof Stiffening Ring design has been transferred to AGI St. Boniface. This will align the AGI bin with the competitors' offerings as well as reducing the cost to stay competitive within the market.

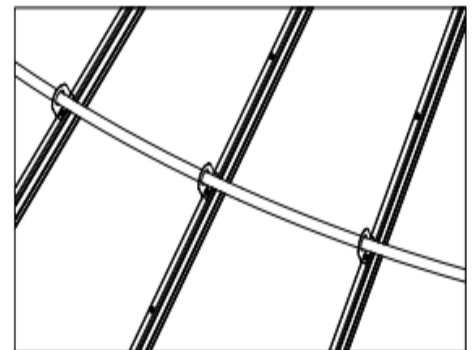

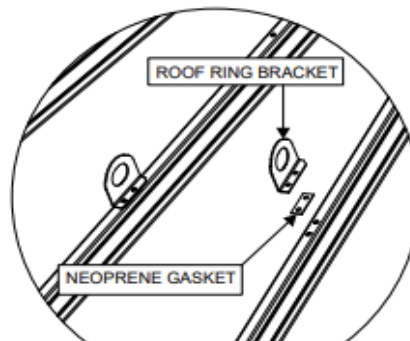

Product Information:

Location of roof stiffening rings have been predetermined and clearly identified within the installation instructions. The roof ring brackets have been designed with ease of installation and safety in mind. By applying the neoprene gasket prior to the bracket allows for a tight seal which avoids any roof leakage.

212115 - Stiffening Ring Bracket

195080 - Stiffening Ring Gasket
(Bag of 50)

Effectivity date: January 1, 2025
