Overview

In alignment with AGI's North American Bin Standardization strategic goals, a review of the demand for the catwalk upright upgrades has been completed. AGI has removed the catwalk upright upgrades from the standard configuration in all bin kits. This decision is supported by the actual demand which indicates that the need to include catwalk upgrades is lower than the need to exclude them.

As a result, if catwalk upright upgrades are required, they must be identified and processed during the quote stage for **all** bins sizes.

To streamline processing once a quote is converted to an order, the CEN/SSK/TPH Catwalk Uprights BOM tool V6 has been updated and can be found on the DSS. This will be used by the CX team or Application Engineering to modify the bin BOM accordingly.

Product Information

- Catwalk upright 232772 & 232773 are no longer standard on any size bin
 - These uprights are made from thicker material to support the heavier catwalk loads
- 4-10kip goal post brackets are no longer standard
- Depending on the catwalk configuration 4-10kip, 6-10kip, 8-10kip and 4-20kip goal post bracket kits are available.
- If catwalk support is required use the Catwalk BOM Changes tool
- Can be found in Dealer Support Site
